South River Technologies® Signs 100th Reseller

Reseller Channel has significant growth in 2004

Annapolis, MD - September 21, 2004 - South River Technologies (SRT) today announced it has signed the 100th company into its reseller program. The program began in 2003, growing significantly this year with the addition of over 70 resellers domestically and abroad.

South River Technologies has 44 resellers in North America and 51 in Europe, with the remainder in China, Australia and Central America. Marron Craft, Ltd., SRT's exclusive distributor in Japan, offers a Japanese version of SRT's flagship product, WebDrive®. "We successfully introduced WebDrive to the Japanese market, promoting WebDrive's excellence to Japanese customers. Localizing WebDrive was made possible with the enormous help from the SRT staff and engineers. We continue to receive very positive feedback from our users," says Matsusaburo Tsukuda Director at Marron Craft. WebDrive allows you to map a drive letter to a remote server and access that drive as if it were on your local machine. Users are given access and the ability to collaborate on files across the Internet in a safe and secure environment using industry standard communication protocols.

The greatest growth in the SRT reseller program has evolved in Germany, Switzerland and Austria. SRT resellers in these countries total 23. German language releases of SRT products WebDrive and Titan FTP Server are scheduled for early 2005.

About Marron Craft

Marron Craft, Ltd. is a Japan-based corporation founded in 2002. It develops and localizes software for the Japanese consumer market. The company has developed and produced programs that run on Microsoft Windows, NT and 2000 operating systems.

About South River Technologies

Founded in 1996, South River Technologies develops file management software which is used for file collaboration, shared access and website management. All SRT products include strong security to provide encrypted data transfer. This unique client technology, commercially available as WebDrive®, integrates into the Windows environment, creating an instantly familiar interface for the end user, reducing training and support costs. This technology is also licensed to independent software vendors to add functionality to existing product suites. ISPs can also license re-branded versions of our products as an add-on to their service offerings.
